

**Minden Gardnerville Sanitation District  
District Manager's Report  
August 2008**

1. EDU allocations: 9.3 EDU's were allocated during the month of July. Scheduled on the upcoming agenda is a request for 29.1 EDU's for the Holiday Inn express at the Minden Gateway project.
2. Effluent Disposal: We discharged 9.3 MG of effluent to Bentley during the month of July. In addition, Park Cattle received 48.1 MG and Byington received 38.8 MG. The new effluent agreements are effective on September 16, 2008. In an effort to alleviate any misinterpretations of the agreements, I am planning to schedule meetings with each of the parties involved to discuss the terms of the agreements.
3. Digester Expansion Project: The digester project is progressing with no outstanding issues at this time.
4. Pollution Insurance: At the July meeting, the Board directed Alan Reed to proceed with an application for the wastewater treatment plant pollution policy to be reviewed by the District Manager and an update be provided at the August 5, 2008 regular Board meeting. I have reviewed the application with Alan and the application for coverage has been submitted.
5. Personnel: Josh Rollings' employment with MGSD was terminated on July 22, 2008. I have some recommendations and proposals for fulfilling the position which I will present at the upcoming meeting. MGSD employee Chris Baracosa recently obtained his Grade II certification and has been promoted to the position of Grade II operator.

Frank T. Johnson  
District Manager
